

SHAPING THE FUTURE OF HEALTHCARE INDUSTRY

**PRESTENTED BY:
ZYPHIX**

PROBLEM STATEMENT

- Fragmented healthcare service
- Limited support for elderly & chronic patients
- Delayed emergency detection
- Difficulty accessing medical records
- Long waiting times for consultations

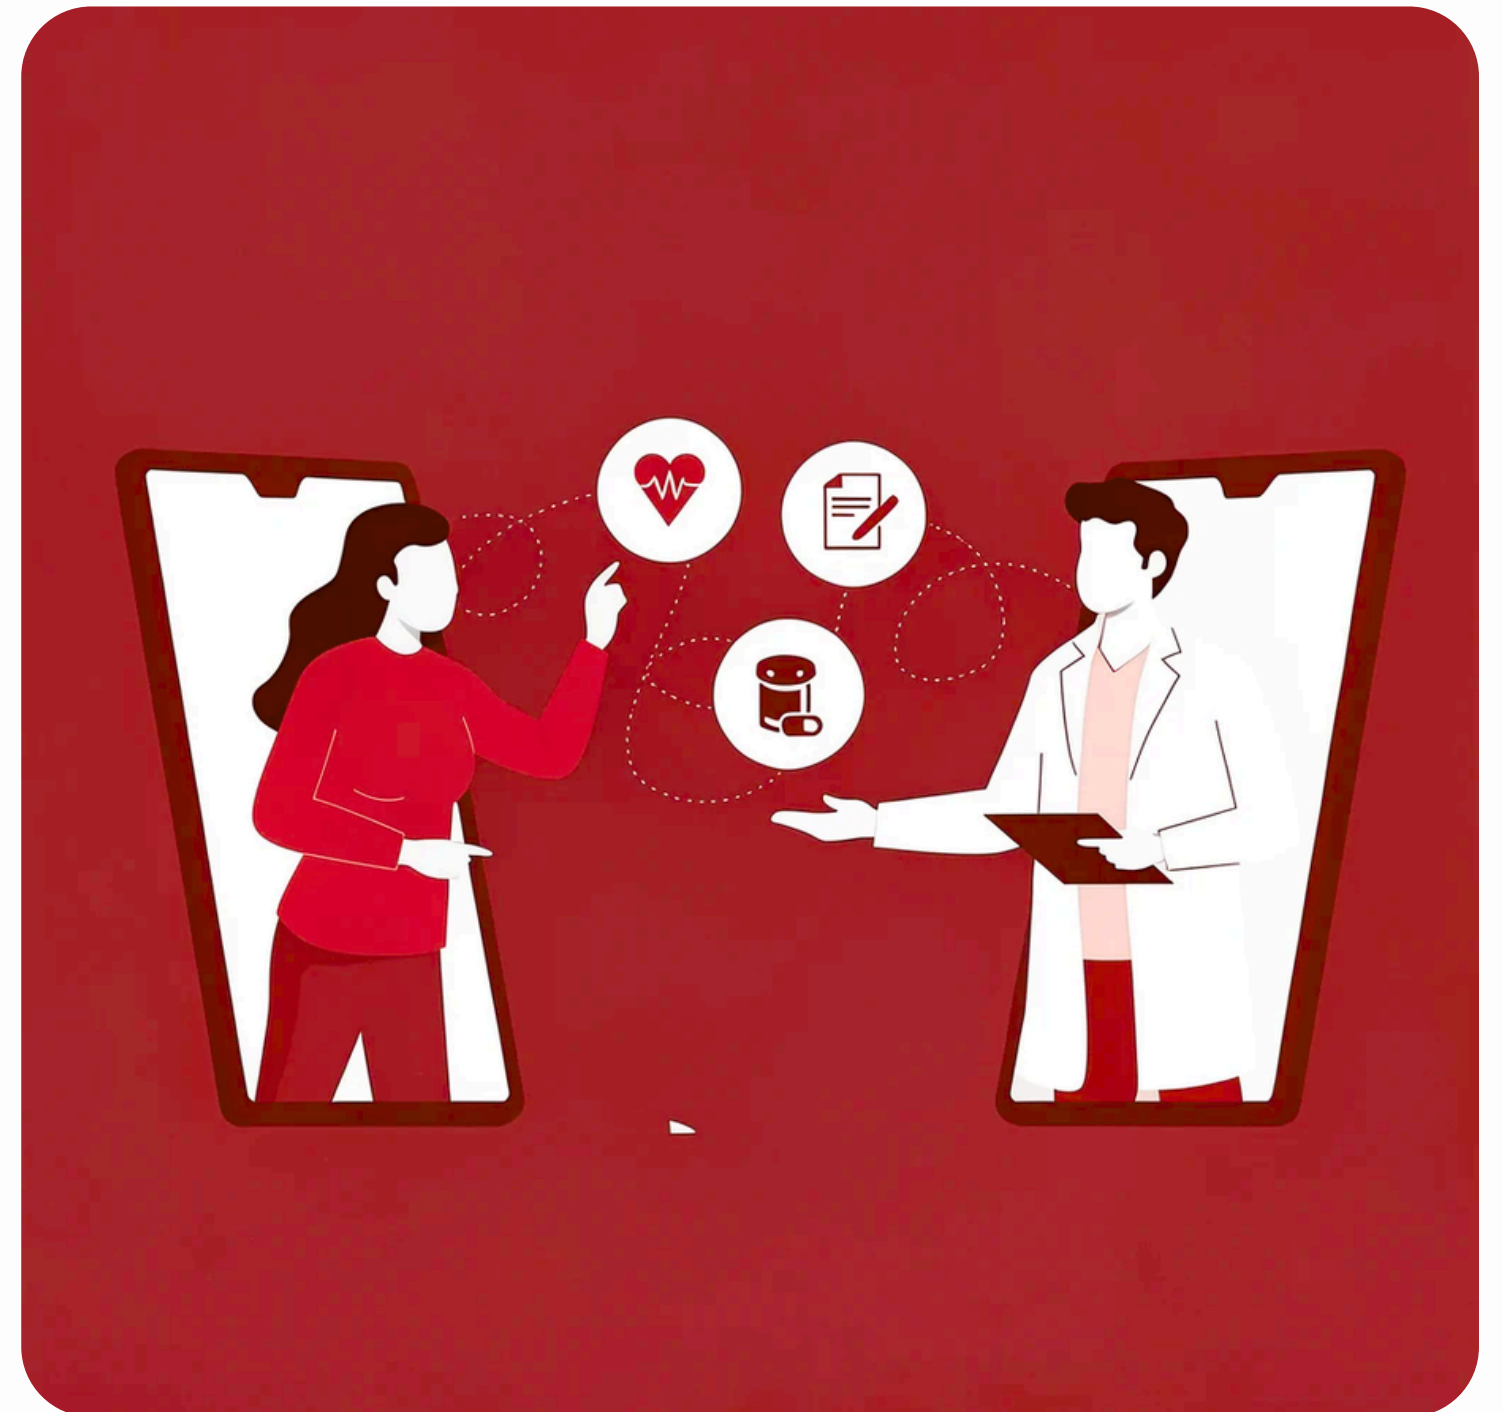

OUR SOLUTION

A UNIFIED HEALTHCARE PLATFORM THAT CONNECTS:

- Doctors
- Patients
- Pharmacies
- Caregivers

AI-POWERED HEALTHCARE ASSISTANCE

CORE FEATURES

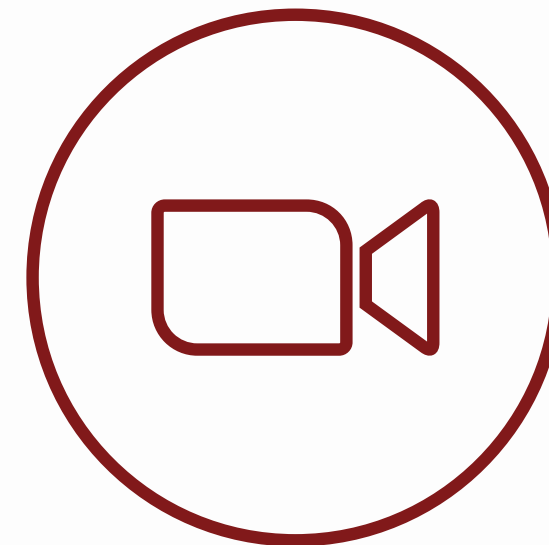

SMART APPOINTMENT BOOKING

- Search doctors
- View availability
- Instant booking

VIDEO CONSULTATION

- Secure online meetings
- Chat & prescription sharing
- Dietary recommendations

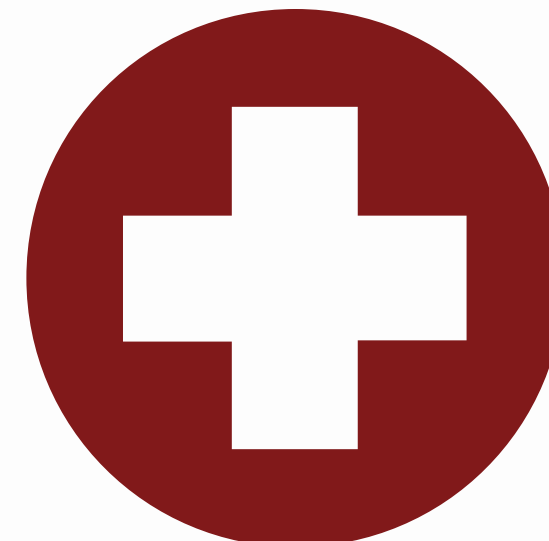

DIGITAL HEALTH RECORDS

- Store reports
- Access anytime

PHARMACY INTEGRATION

- Receive prescriptions digitally
- Order medicines easily

TARGET USERS

DOCTORS

1. Manage appointments
2. Monitor patient history

PATIENTS

1. Easy doctor access
2. Medicine reminders
3. Digital records

PHARMACIES

1. Receive e-prescriptions
2. Medicine inventory management
3. Medicine delivery

ELDERLY

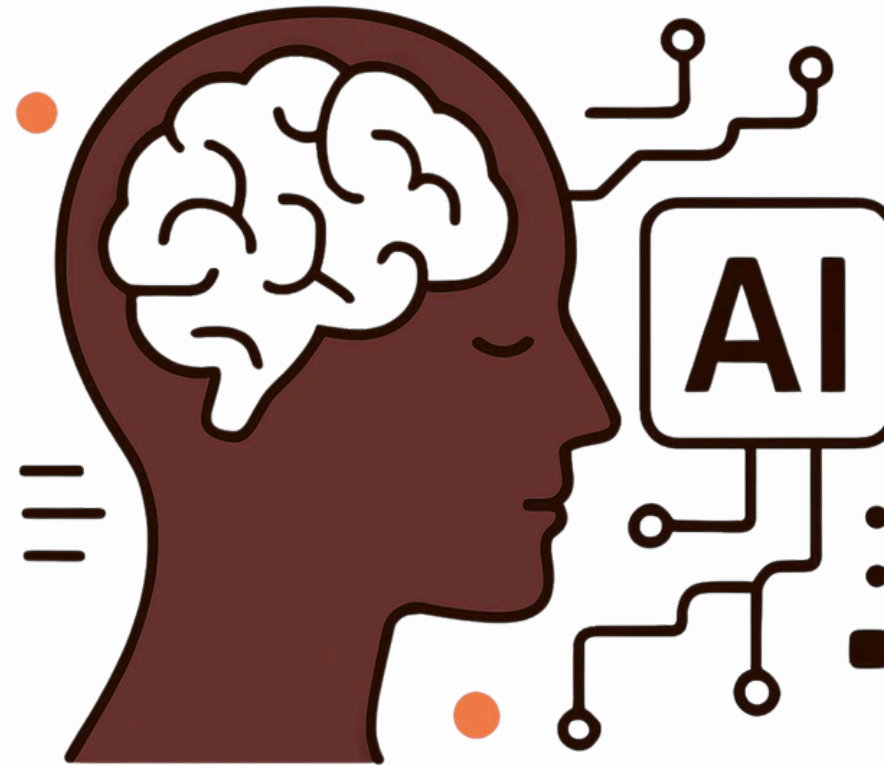

1. video consultations
2. Continuous vitals monitoring (Future innovation)
3. Emergency alerts (Future innovation)

AI FEATURES

DOCTOR RECOMMENDATION ENGINE

Suggests doctors based on:

- Symptoms
- Specialty
- Ratings
- Availability

PRESCRIPTION OCR

Upload prescription image.

AI extracts:

- Medicines
- Dosage
- Duration

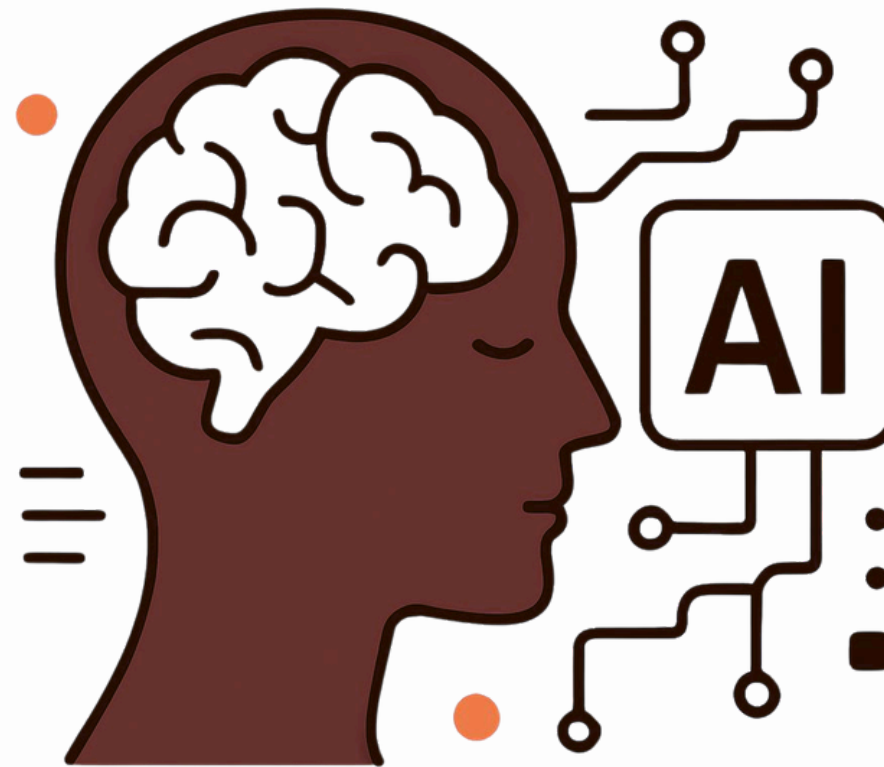

AI FEATURES

AI SYMPTOM CHECKER

User enters symptoms.

AI provides:

- Possible conditions
- Detects location
- Recommended specialty
- Next steps

MEDICAL REPORT SUMMARIZER

Upload reports.

AI converts medical jargon into simple language.

WORKFLOW

1

**BOOK DOCTOR
VISIT/ONLINE
CONSULTANT**

2

**DOWNLOAD
PRESCRIPTION**

3

**ORDER
MEDICINES
ONLINE**

4

**SET MEDICINE
REMINDERS**

5

**AI CHAT BOTS
FOR DOUBTS
AND SYMPTOMS
CHECKING**

FUTURE INNOVATION

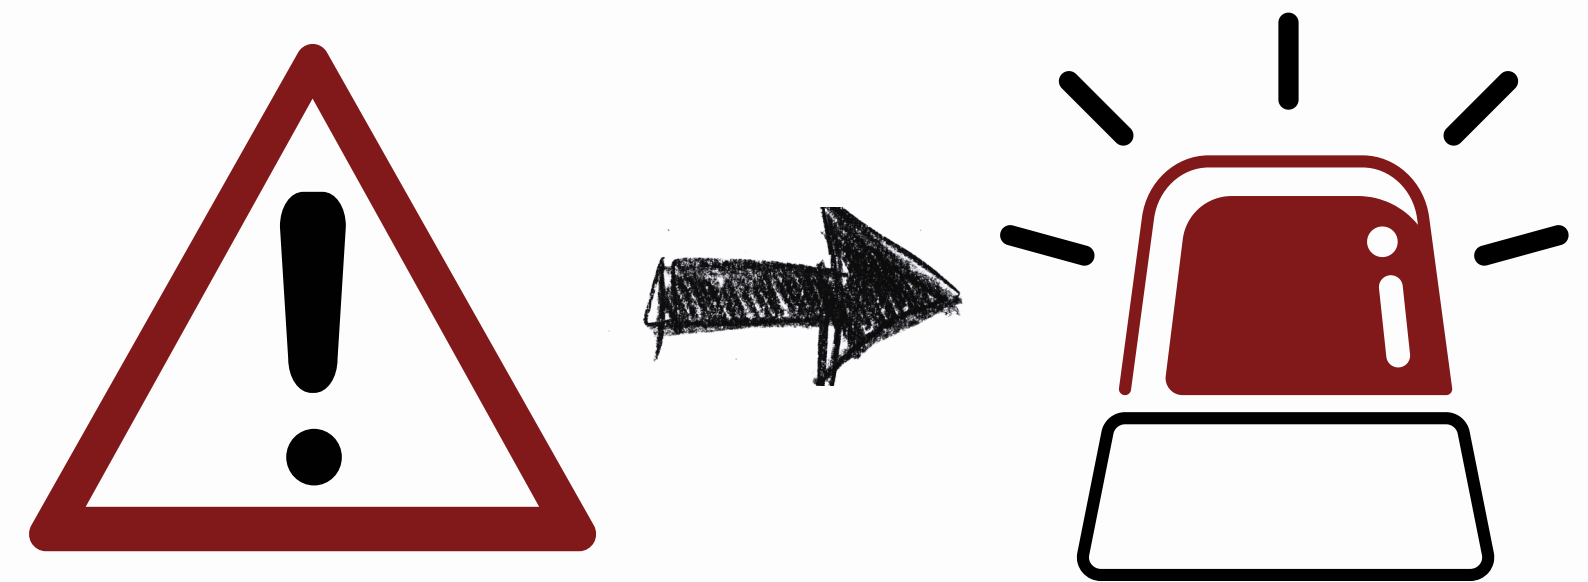

REMOTE VITAL MONITORING

Using:

- Smartwatches
- Fitness bands
- IoT devices

AI EMERGENCY DETECTION

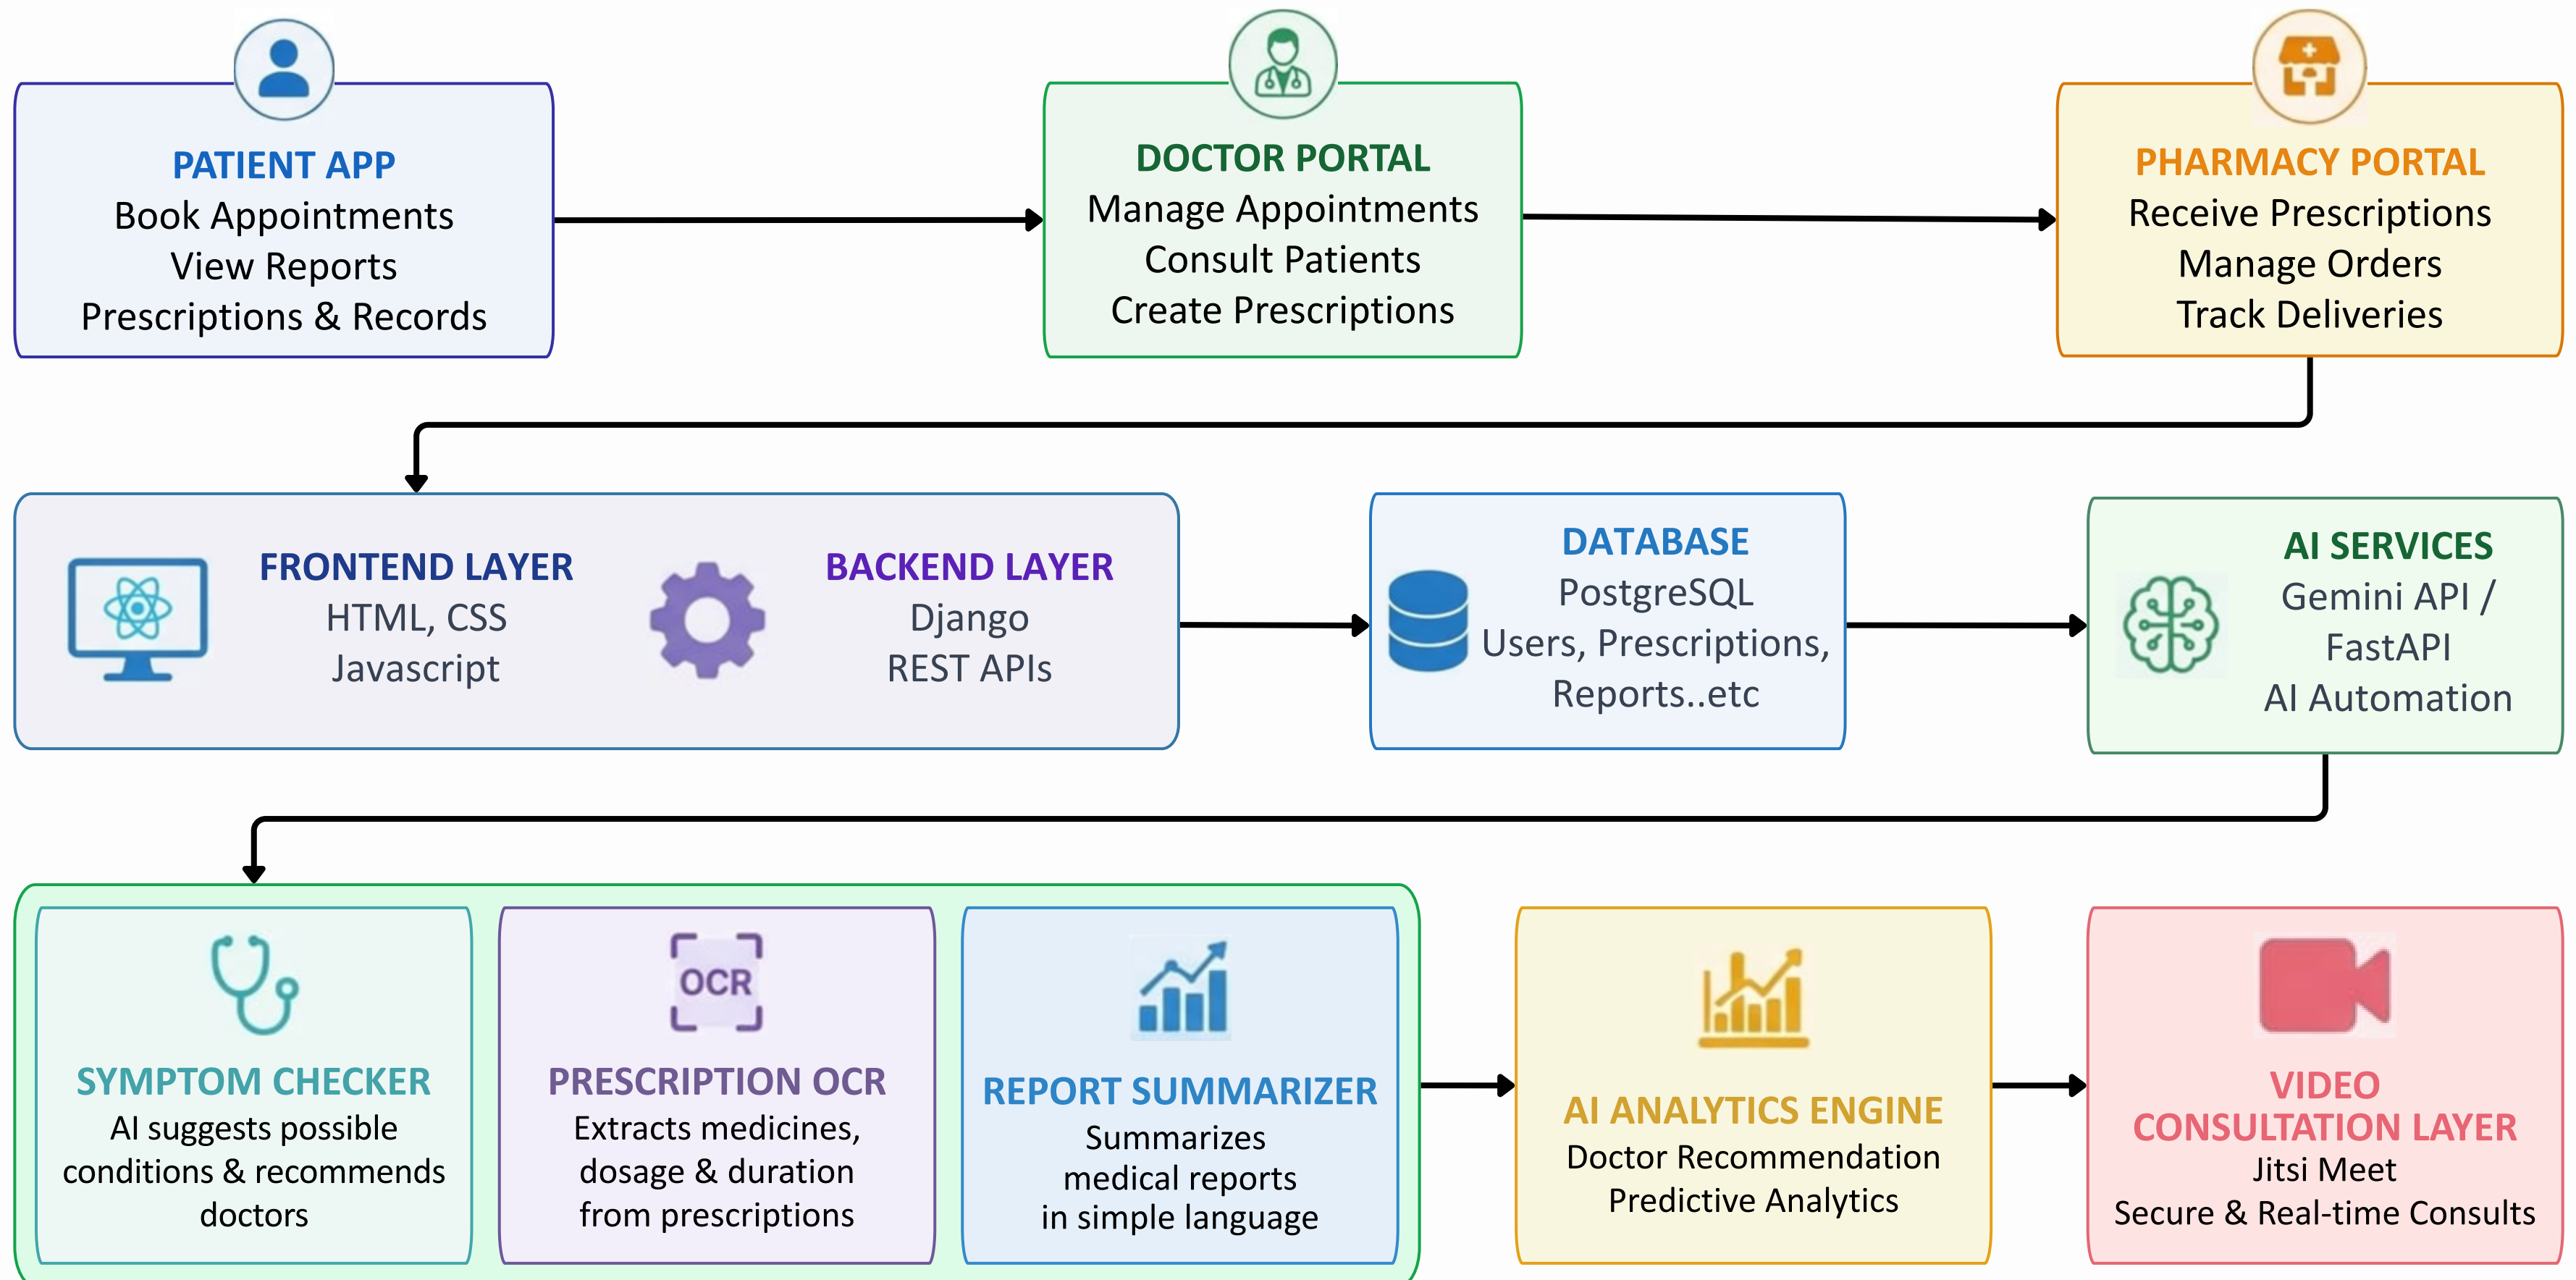

If abnormal readings are detected:

- Alert patient
- Alert caregiver
- Recommend emergency action

TECH STACK

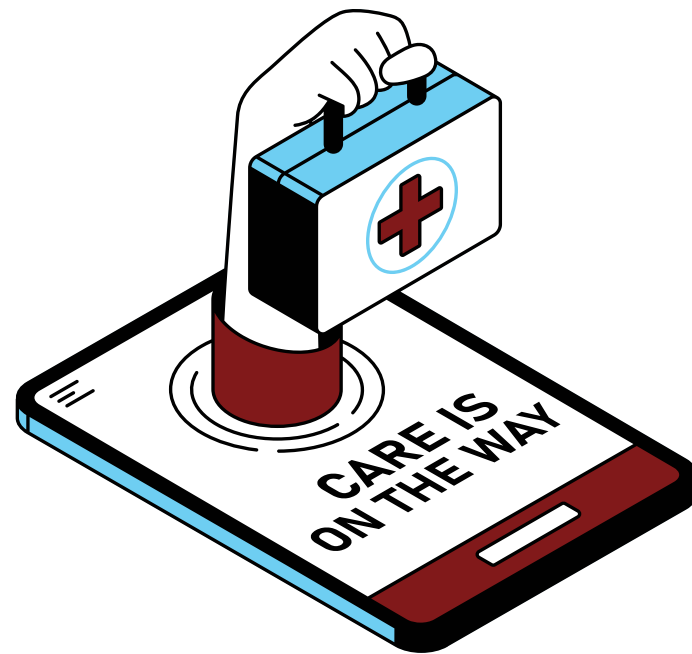

LAYER	TECHNOLOGY	PURPOSE
Frontend	HTML, CSS, JavaScript	User Interface
Backend	Django	Business Logic & API
Database	PostgreSQL	Data Storage
AI Engine	Gemini API	AI Healthcare Features
OCR	Tesseract OCR	Text Extraction
File Storage	Cloudinary / AWS S3	Medical Reports
Video Consultation	Jitsi Meet API	Doctor-Patient Video Calls
Version Control	Git & Github	Source Code Management
Deployment	Vercel	Application tracking

SYSTEM ARCHITECTURE

IMPACT

FOR PATIENTS

- Reduced waiting time
- Better accessibility
- Faster consultations

FOR DOCTORS

- Improved efficiency
- Better patient tracking

FOR HEALTHCARE

- Digital transformation
- Early risk detection
- Better chronic care management
